

LEAFY 2000

HYBRID PEARL MILLET

Evergreen Seed is proud to introduce to you the superior Hybrid Pearl Millet “*LEAFY 2000*”. Leafy 2000 is an improved version of leafy 20 hybrid pearl millet, bred by Coffey Seed Co. in Texas. Leafy 2000 will be exclusively marketed by Evergreen Seed as its premium variety of hybrid pearl millet.

Leafy 2000 is medium semi-dwarf (6-8 feet), very leafy (improved leaf stem ratio), somewhat finer stemmed, vigorous as seedlings and re-growth, tolerant of drought, has improved foliar disease resistance, performs better in sandy and otherwise marginal soils than sorghum sudangrass hybrids.

This newer hybrid pearl millet has excellent grazing and haying potential with good re-growth after clipping. Clipping should be done in the pre-boot stage.

Hybrid pearl millets do not contain prussic acid as do sorghum hybrids and are therefore more useful for horse feed.

- ◆ Leafy 2000 is suited for grazing and hay production and capable of multi-harvests.
- ◆ Seeding rate is 30-40 lbs. per acre.
- ◆ Packed in 50 lb. Evergreen Seed Leafy 2000.
- ◆ Available February 2000.
