

TRITANIUM

Perennial Ryegrass

Blend

Blended specifically for our Region. Tritanium combines three improved Turf Type Perennial Ryegrass varieties. This blend provides maximum turf performance for home lawns, golf courses, parks and athletic fields.

Newer cultivars make this blend less susceptible to disease such as brown patch, red-thread and rust. It is a dense forming turf with excellent green up and rapid establishment.

Perennial Ryegrass is great for overseeding Warm-season lawns. If you are planning a turf project with Perennial Ryegrass you definitely must consider Tritanium in the equation. Newer genetics make this a lush, dense green turn with outstanding performance for any project.

SEEDING:

Date – Spring and fall when soil temperatures are 60 degrees Fahrenheit or higher. Perennial ryegrass is the fastest establishing cool-season Turf-grass species available to the lawn care professional and homeowner. Late autumn and winter turf quality ratings of newer varieties and blends such as Tritanium demonstrate that they can rapidly develop and maintain an attractive turf cover into late autumn and winter.

Rates – 6.0 TO 8.0 lbs. Per 1000 sq. ft. Seed count is approximately 255,000 seeds per lb.

Depth - sow at $\frac{1}{4}$ to $\frac{1}{2}$ inches
