# WL 363HQ

## WL 363HQ Advantages:

- Very high yielding under 4-, 5-, and 6-cut harvest managements (FD=4.9); the highest-yielding winterhardy HQ released to date.
- Superior digestibility produces more milk or beef and greater profitability when fed; WL 363HQ consistently beats the competition in head-to-head digestibility comparisons.
- Very winterhardy (WH=1.6); WL 363HQ delivers long stand-life, even under the toughest weather conditions.
- A great choice for cash hay, WL 363HQ delivers very high RFQ and TDN numbers across a wide range of haying conditions.
- Proven ability to "hold" high feed value in the field over a longer period of time; WL 363HQ delivers higher forage quality and greater harvest flexibility with less risk of rain damage to hay and haylage when harvest is delayed.
- A "perfect" disease resistance index (DRI) of 30/30 and high resistance (HR) to both stem and root knot nematodes produces big yields and long stand life across a wide range of soil types and growing conditions.
- Fast recovery after cutting and superior standability encourages intensive harvest management.
- Dark green, fine-stemmed, and highly palatable.
- Excellent early maturing companion variety to WL 319HQ and WL 343HQ.
- Well-adapted for hay and haylage use in the Midwestern, Northeastern, Northwestern, and Central Plains regions of the U.S.
